

CSI CRIME SCIENCES INC™

Does your forensic light source have a narrow band pass filter?

Is your forensic light between 440 and 490nm in wavelength?

Does your forensic light source use a rechargeable battery?

If you've answered no to any of these questions, or if you don't know the answers, then you will never know what evidence you have been missing!

Come and see us at our booth, and find out how you can find more evidence. Find out why the majority of sexual assault investigative and treatment centers in New Mexico and Canada have chosen the Flare!

CSI CRIME SCIENCES INC™

An Invitro Sciences Inc. Company
Bringing Science to Law Enforcement
And Crime Scene Investigation
